Hiring Manager
Motive

To whom it may concern,

I'm excited to apply for the Software Engineering Internship position at Motive that I found on LinkedIn. I believe my skills in Python, OOP principles and a strong foundation in software engineering principles along with an eager attitude towards learning the tricks of the trade makes me a valuable addition to the company.

Throughout my four years studying Computer Science, I've learnt that the primary role of a software engineer is to, solve real-world problems. I've also accumulated experience regarding software design methodologies, to be a team-player and interdisciplinary team collaboration. One of the crown jewels of my time at Habib University is a django backend I developed for a flutter application that was a cloud-based team to-do application.

Trying to come up with exciting solutions using the latest technologies, is something one should always strive to do. One of the reasons, I am so excited to apply at Motive is the fact that they have a strong focus on using cutting-edge tools like ML and CV to create solutions that has an impact on the world. I tried to do something of the same sort in my Final Year Project where I'm creating an LLM-focused Chatbot to create an unparralleled customer service platform

Thank you for your time and consideration. I'm looking forward to learning more details about the Software Engineering Internship position at Motive. Growth is essential to my continued success, and I'm excited for the chance to be a part of Motive's industry-leading team.

Sincerely, Muhammad Talha
